

## **Gustav Wolf Seil- und Drahtwerke GmbH & Co. KG** **celebrates its 125 th Anniversary**

On September 16th, there is a celebration at **Gustav Wolf**. The company is looking back on a long and successful history, during which Gustav Wolf has developed from a regional producer to a worldwide operating company, well positioned for the future.

In fact, the company is even older - the roots of the family operation can be traced back to 1737.

The current location in Gütersloh, Germany is the very one where in 1912 Gustav Wolf started developing wire rope production for the mining industry, which was the main activity at the time.

The many important developments throughout the company history show the creativity and also the courage of this entrepreneurial family, for courage is necessary when deciding to leave familiar surroundings. Today, Gustav Wolf is a modern, internationally established company with many production and distribution sites all over the world.

The Drahtseil-Vereinigung e.V., an Association of wire rope producers, also owes a lot to this company. Eduard Wolf was one of its founding members in 1945 and was elected to be Vice President at the time.

Right up to the present day, the Wolf Family, under the direction of Dr. Ernst Wolf, are still active within the Drahtseil-Vereinigung e.V. and are fully involved in the multifaceted branch of wire rope production, alongside their own business activities.

So, on this anniversary occasion, the Drahtseil-Vereinigung e.V. would like to thank the Gustav Wolf Company and wish them, on behalf of all our members, continued success for the company's future.
